

Writing Numbers

Time limit: 1.00 s

Memory limit: 512 MB

You would like to write a list of positive integers $1, 2, 3, \dots$ using your computer. However, you can press each key $0\text{--}9$ at most n times during the process.

What is the last number you can write?

Input

The only input line contains the value of n .

Output

Print the last number you can write.

Constraints

- $1 \leq n \leq 10^{18}$

Example

Input	Output
5	12

Explanation: You can write the numbers $1, 2, \dots, 12$. This requires that you press key 1 five times, so you cannot write the number 13 .
