

Tree Isomorphism I

Time limit: 1.00 s

Memory limit: 512 MB

Given two rooted trees, your task is to find out if they are *isomorphic*, i.e., it is possible to draw them so that they look the same.

Input

The first input line has an integer t : the number of tests. Then, there are t tests described as follows:

The first line has an integer n : the number of nodes in both trees. The nodes are numbered $1, 2, \dots, n$, and node 1 is the root.

Then, there are $n - 1$ lines describing the edges of the first tree, and finally $n - 1$ lines describing the edges of the second tree.

Output

For each test, print "YES", if the trees are isomorphic, and "NO" otherwise.

Constraints

- $1 \leq t \leq 1000$
- $2 \leq n \leq 10^5$
- the sum of all values of n is at most 10^5

Example

Input	Output
2 3 1 2 2 3 1 2 1 3 3 1 2 2 3 1 3 3 2	NO YES
